

Aesthetic Source – innovation in aesthetics delivered to you.

Dr Xavier is speaking at the ACE Conference - March 2019 (London) about medium depth chemical peels.

The conference attracts medical aesthetic professionals from across the UK and further afield.

Dr Xavier was asked to present because of his years of experience with medical peels, which are one of his passions.

Within this exclusive masterclass, Dr Xavier Goodarzian will share his expertise on peeling at all depths with the Skin Tech portfolio of superficial and deep peelings.

The masterclass will cover an element of theory, in-clinic case studies as well as a live demonstration to showcase practical application and patient aftercare. Don't miss out!
